Dear Steina and Woody,

yesterday evening we broadcast your interview during the first number of our new cultural magazine "Nautilus". I am happy to tell you that it's been widely appreciated both outside and inside our TV station, and this because the interest of your work and your statements. I hope this will open the way towards a greater space for video art in our programs.

What's more, many colleagues told me to be very interested in having the opportunity of experimenting with video like we did in Locarno, so I promised them to invite you to spend a few days in Lugano on the occasion of one of your next trips to Europe... What do you think of this idea? Of course the costs would be assumed (I hope) by the TV.

I am sending by separate parcel the cassettes you left me; I could not sell them, but I managed to have the broadcasting rights paid on the basis of 100.- swiss francs per minute (I used about 6 or 7 minutes).

Me and my friends have a good souvenir of both of you.

We all hope to meet you again.

Friendly yours,

mario conforti
