THE VASULKAS

Electronic Media Artists

During this Thursday evening program, Steina and Woody Vasulka will lecture on their work as electronic media artists, and, in addition, will screen their video work. The Vasulkas explore the generation and manipulation of the electronic image through a broad range of technological tools and aesthetic concerns.

Both artists are Master Artists-in-Residence at the Atlantic Center for the Arts, New Smyrna Beach, Florida. This husband and wife team founded The Kitchen, a New York City Media Theater. Steina Vasulka's work has been exhibited and broadcasted extensively in the United States and Europe. As a violinist, Steina was one of the first to interface video with musical performance. Woody Vasulka, a Guggenheim Fellow, has also participated in major video shows worldwide and is currently investigating "digital space." The Vasulkas have received numerous distinctions, including the recent Maya Deren Award from the American Film Institute.
